Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Saturday 04 Dec 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Becoming cloudy, windy with outbreaks of locally heavy rain. Cold.

Today:
Many places dry at first with sunny spells, but cloud and outbreaks of locally heavy rain will spread east this morning, turning to sleet or snow over high ground. Becoming windy later, with coastal gales likely. Feeling cold everywhere. Maximum temperature 5 deg C (41 deg F).

Tonight:
Windy, cloudy with spells of occasionally heavy rain, turning to sleet or snow over high ground and leading to some accumulations. Gales will persist along the coast. Minimum temperature 0 deg C (32 deg F).

Sunday:
Areas of heavy rain are likely at first, with hill sleet or snow, these gradually dying away to leave cloudy conditions with scattered coastal showers. Winds slowly easing. Feeling cold. Maximum temperature 8 deg C (46 deg F).

Outlook for Monday to Wednesday:
Monday or Tuesday windy at times with bands of rain and strong winds tracking east, preceded by some snow. Drier Wednesday but potentially very windy, Rather cold, some overnight frosts.
